

## About us

### *GROWTH THROUGH INNOVATION WITH ULTRASOUND*

---

SONOTEC was founded in the beginning of 1991 by the physicists Dr. Santer zur Horst-Meyer and Hans-Joachim Münch and has been owner-managed since then. With currently more than 170 employees, today we are a growing technology company established on the market as a provider of products and solutions using ultrasonic measurement technologies. We offer products and solutions with ultrasound for:

**Non-destructive Testing**

**Preventive Maintenance**

**Non-invasive Fluid Monitoring**

Together with you, our client, we initially analyse your exact measurement and metering requirements. This enables us to develop optimized ultrasonic solutions to suit your precise needs. We produce high-precision and high-quality equipment at fair prices.

We are able to achieve this because of:

our highly-qualified employees in research & development, production and distribution

our innovative products

our customer-oriented working methods

## **Our story in 60 seconds**

---

## Our Business Units

### Preventive Maintenance

Under the brand name "SONAPHONE", we offer ultrasonic testing devices for leak detection and evaluation, condition monitoring tasks, steam trap testing and electrical inspections.

### Non-destructive Testing

Flaw detection, wall thickness measurement, air-coupled ultrasonic inspections and phased array testing - we handle all products and solutions regarding non-destructive testing.

### Non-invasive Fluid Monitoring

The business unit „Non-invasive Fluid Monitoring“ is your reliable partner for flow measurement, bubble detection, fill level monitoring and blood leak detection.
