
Release Notes

Computer software for display, evaluation and export of high-resolution measurement data from the SONAPHONE LevelMeter App and the SONAPHONE AssetExpert App

SONAPHONE HR-DataReader V1.4.2

Notes on this document

Purpose

This document is an integral part of the online user documentation of the SONAPHONE HR-DataReader and contains relevant information about the current version

Up-to-date

Every effort has been made to ensure that the information contained in this document is complete and correct at the time of release. This document describes all units and functions known of at the current point of time.

Illustrations

Illustrations used in this manual do not always contain all details or special cases. They only represent the relevant information.

Further information

Descriptions and instructions for the SONAPHONE HR-DataReader can be found in the online user documentation:

🔗 https://www.sonotec.de/doc/sonaphone/sonaphone_hr-datareader/en/

System requirements

A detailed overview of the system requirements can be found in the online user documentation:

☞ https://www.sonotec.de/doc/sonaphone/sonaphone_hr-datareader/en/system-requirements.html

SONAPHONE

- SONAPHONE – Digital Ultrasonic Testing Device
- SONAPHONE Measurement Core V2.2.0
- SONAPHONE LevelMeter App V2.2.3 and SONAPHONE AssetExpert App V2.2.4
- HR DataLicense for LevelMeter App
- SONAPHONE DataSuite V2.2.7

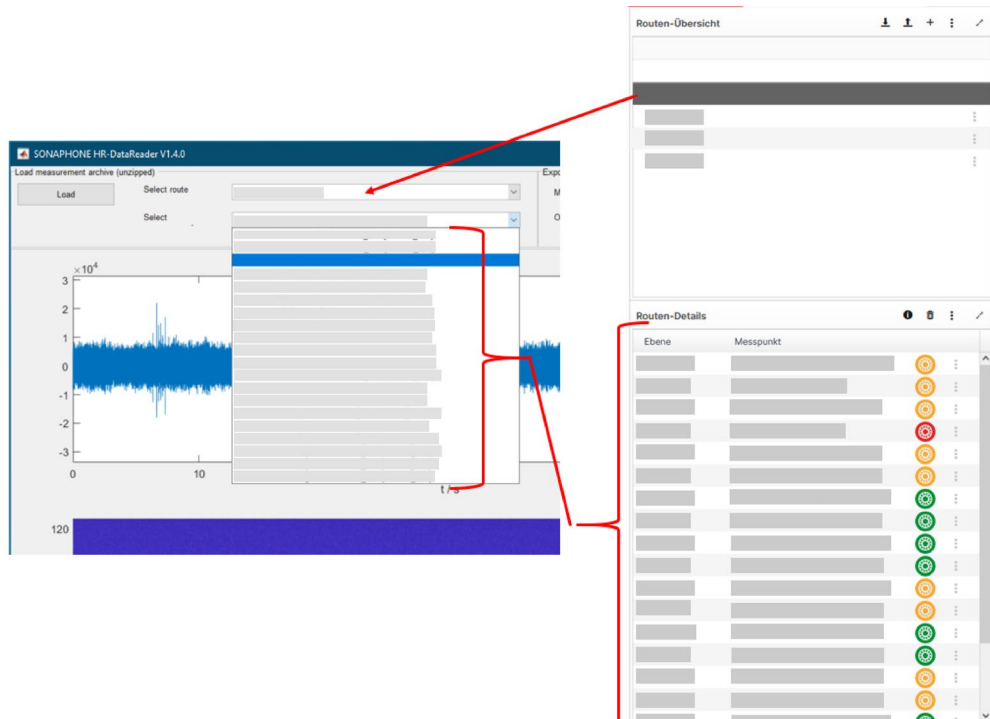

PC

- Additional software: MATLAB Runtime R2019b (version: 9.7)

New features and important changes

Import archive folders

The new import function of the HR-DataReader can be used to import archive folders that were created from the AssetExpert App. The ZIP files must be extracted first. The structure of the ZIP archive differs from that of the LevelMeter App.

'Select route' for the import

Bug fixes and improvements

- Bug fixes
- Adaptation of the user interface (addition of the 'Select route' option)
