## EVALUATION OF TEST DATA RECORDED WITH THE LEVELMETER APP

---

The SONAPHONE DataViewer software can be used to evaluate test data recorded with the LevelMeter app on a Windows PC or tablet.

### CLEAR PRESENTATION

---

The folders and measurements selected when exporting test data are clearly listed together with the associated photos, text comments and voice memos in order that individual measurements can be retrieved more quickly.

### VISUALIZATION AND DATA PROCESSING

---

Recorded test data can be played back and is represented by means of suitable diagrams for level graph and spectrogram. Individual areas can be focused on here over the time progression of the test data, and can be exported for further processing.
